Ergonomic Material Handling & Automation

Industrial manipulators, AGVs and handling automation — engineered for safety and productivity.

Get a Quote

Our Product Range

Industrial Manipulators
Liftronic & Pneumatic lifting systems.

AGVs
Automated guided vehicles & intralogistics.

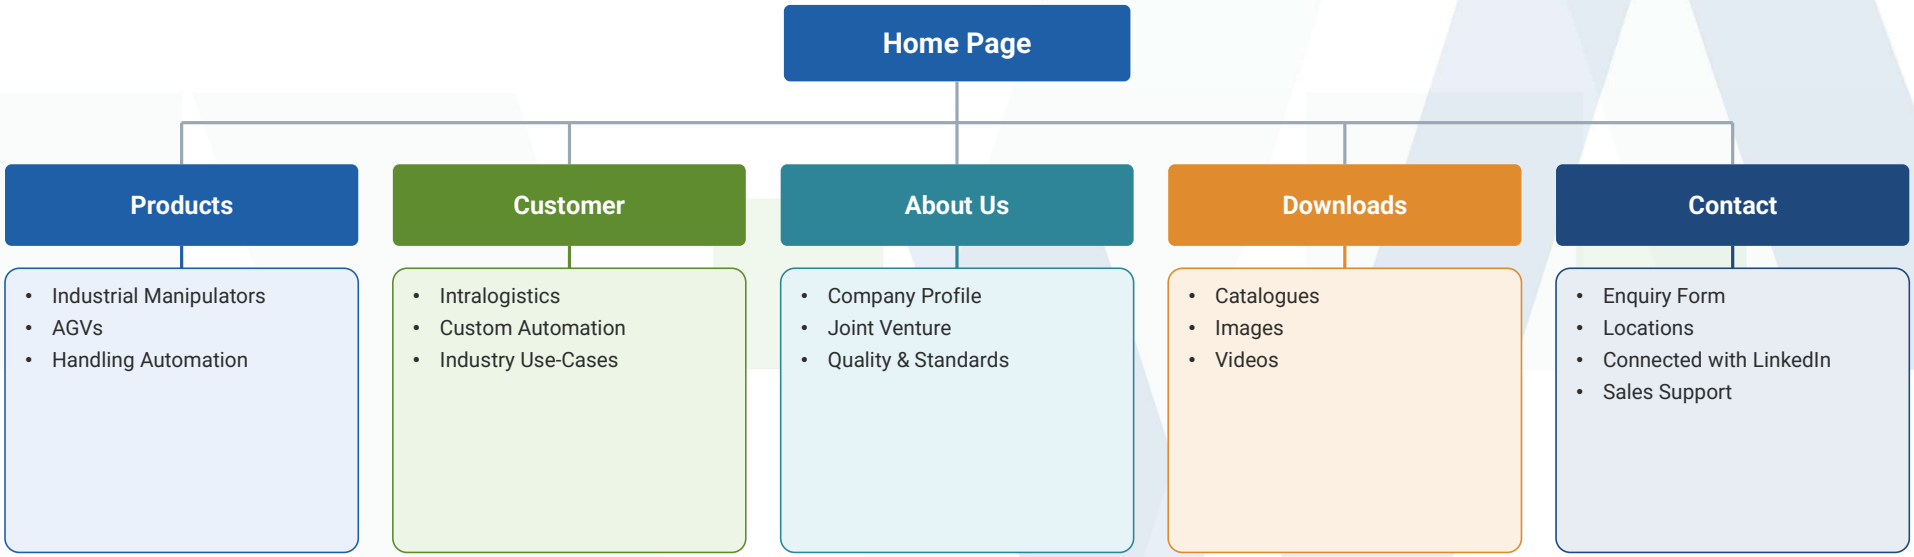

Handling Automation
Custom turnkey automation solutions.

About Us

Indeva Ergomatic India Private Limited is a leading provider of advanced **industrial manipulators** and **material handling automation solutions**. Formed through a strategic joint venture between **Scaglia INDEVA S.p.A.**, a global pioneer in ergonomic automation, and **Ergomatic Automation India Pvt. Ltd.**, known for its strong local expertise, the company combines international innovation with deep market understanding.

With **over 100 years of combined experience**, Indeva Ergomatic India is committed to delivering solutions that enhance **safety**, **productivity**, and the **quality of work environments**. Our focus lies in designing and implementing ergonomic equipment and automation systems that meet international standards, particularly in **difficult and dangerous areas** where reliability and safety are paramount.

Guided by the values of **innovation**, **sustainability**, and **growth opportunities**, we aim to empower industries with cutting-edge technology while serving customers, partners, and communities with renewed passion and excellence.

Products

- Industrial Manipulators
- Automated Guided Vehicles (AGV's)
- Handling Automation

Ergomatic INDEVA GROUP COMPANY

Industrial Manipulators

- Electronic Series
- Electro-Pneumatic Series
- Pneumatic Series

Automated Guided Vehicles (AGV's)

- AGV Standard Models
- AGV Custom Solutions
- AGV Accessories and Option
- Intralogistics Solutions

Automated Guided Vehicles

Advantages of AGVs - Automatic Guided Vehicles- compared to traditional forklift trucks with operators.

•Precise and safe operation
Predictability of AGVs; routes remain unchanged over time. Operation 24/7 with no human intervention required. Elimination of the risks associated with use of forklift trucks. No damage caused by AGVs to goods, machinery or permanent structures

•Easy-to-assemble and easy-to-maintain,
thanks to 'all plugs' feature. All components are connected using connectors that do not require the use of screwdriver. This allows a very easy and quick assembly or replacement of parts.

•Advanced programming interface
Quick and easy programming by means of a touch panel or PC interface. Possibility to introduce interfaces with external input/output signals. Thanks to the closed-loop control system, the AGV does not require initial parameter set-ups. Only basic settings (hour and date, language choice, password) are required at the AGV installation. The software interface is designed to be self-explanatory and does not require long training to learn the programming of the AGV.

•**Higher speed and stability in turns:**
A closed loop control system enables precise tracking of the magnet guide tape without deviation or variation.

•**Flexibility**
No conventional materials-handling infrastructures required. The number of AGVs can be increased as business grows. Updates are possible without shutting down the entire system. Work flow shared efficiently and dynamically between AGVs in use. Routes are easy to reconfigure if needed, new AGVs easily added. Compatibility with any type of automation. Traffic management system guaranteed to avoid collision**.**

•**Efficient, reliable and flexible transport**
Just-in-time delivery. No destination errors. More precise inventory management. Elimination of material stocked on the production floor.

•**Optimum quality to price ratio**
Low running and maintenance costs.

Total Cost Of Ownership (TCO) :-

Industrial Manipulators

Electronic® Series

Liftronic® Series (Electronic)
Liftronic® Pro
Liftronic®Pro Column mounted
Liftronic® Pro – Overhead rail – ceiling mounted with arm
Liftronic®Pro – Overhead Rail Mounted
Liftronic®Pro – Liftruck
Liftronic® Pro – Linear Version
Liftronic® Pro – Telescopic
Liftronic® Easy
Liftronic® Easy – column mounted
Liftronic® Easy – overhead rail – ceiling mounted with jointed arm
Liftronic®Easy – Overhead Rail Mounted Manipulator
Liftronic® Easy – Liftruck version
Liftronic® Easy – Linear Manipulator version
Liftronic® Air
Liftronic®Air – Column mounted
Overhead rail – ceiling mounted INDEVA® Liftronic® Air
